From the dark - I was live
I find my heart - Which I save

My secret love - Between the dark
No one feel - My witch's lark

I need smell - her black heart
While I listen her classic harp

Every time - I need her hand
Touch my face- touch my sand

Let the moon - gives you light

To see your red hair - to feel your sight

We are alone - in the dark
We can loath - kiss and hug

Between the trees - I heard the crows
Need my secrets - thy need my rose

I love them voice - in the dark
Gave me the death sense - filthy heart
