From this forest
I feel them lust
To the endless suffer
To the victims blood

They are feel with someone - walking on the road
They are breath the smell of a women - like the
bloody explode

Now its the time
To refresh them bones
They are five
In the darkness road
Waiting victims
To drink them blood
Any source
To create them power

Now she is near
From them dark

She is a pregnant
And no one care

They saw her face
They cant stop them lust
She is a beauty
The Pregnant raped to blood

She don't have any thing but screams
She cant do any thing but her son tear's

Solo by (Azareum)

Through her blood - they ignore them hate
They sucked her blood
They slay her body to many pieces
