A Secret Society of the worlds elite  
Behind a veil of mystery  
Invisible enemy  
Secretly they plot disaster  
And ensure that someone else is to blame  
Manipulate the public opinion  
To demand that something must be done  
They openly offer solutions  
To the problem that they have created  
Solutions that they have planned from the start  
Contemptuous world of deception  
Contemptuous world of deception-Contemptuous new  
world of deception  
We are on the cusp of an incredible global change  
Centralize the world into one government  
Their agenda of globalized enslavement  
As many still believe we are free  
They openly offer solutions  
To the problem that they have created  
Solutions that they have planned from the start  
Contemptuous world of deception  
Contemptuous world of deception-Contemptuous new  
world of deception  
The media spits out lies to a population of drones  
Keep the people traumatized and at war among their  
own  
Silence those who expose the truth with ridicule and  
mental abuse  
Mass control of our thoughts and discard all who rebel  
They openly offer solutions  
To the problem that they have created  
Solutions that they have planned from the start  
Contemptuous world of deception  
Contemptuous world of deception  
Contemptuous new world of deception
