Look at you, more beautiful than ever

Verse 1

Did I stay away too long
Have we grown apart are we still cool?
Crazy ideas I've been thinking every minute cause I
miss you

Now you look more beautiful than the day I first met
you
Yes, true love keeps growing up but it always feels
younger

Chorus

I see your face and everything feels new again
Love til the end starts over again
Just like the first time(over and over)
Feels like the first time every time

I hold you I go back to the beginning
Remember when we traded our first kisses
Over and over x 3

Verse 2

I see you face and the vibe is sexy
Come take a picture with paparazzi
And I'll be feelin' on your hips all over again and again
And if you ask I'ma take it to the kitchen sink and strip
Keep you feelin' like you lovin' this relationship
And I think I'ma love you til the end starts up again
We've been best friends but then that's how it's always
been

Like a classic chardonnay you're so sweet and so
smooth girl
So I appreciate you babe cause when we get together it
get better and better

Chorus

I hold you I go back to the beginning

Remember when we traded our first kisses
Fell in love with you the feeling hasn't changed
The newness stays the same just like the first time

Bridge

From the moment I fell in love with you
You stirred up feelings like I never knew
How could it be my dreams have all come true?
Are they still fresh every time
Never lose the new

Chorus

Every time I see your face
It's like the first time...every time

Chorus

Over and over...
