Chorus

Lovin' you and me underneath the tree
It will be oh so cudley forever
It will be so right ridin through the night
Holding tight (until the morning light)

I'll make a special wish it will be my gift
With a kiss merry christmas girl
Silver bells will ring children start to sing
It will be joy to the world

Children waking up out of bed
To see it rudolph's nose is really red
To take a peak at santa on his way bring toys today

It may not be so cold under the missel toe don't you
know
It will bring you love we will keep the peace
It will be a treat at the feast will you fill me up
When snow is all around neighbors come around
With the sound of carols at your door snowflakes will
fall
We will have a ball at the mall that's what Christmans is
for

Now that christmas time is here there's a message we
should all make clear don't let magic ever fade away
and we can make it last forever and a day

Children waking up out of bed to see if rudolph's nose
is really red to take a peak at santa on his way bringing
toys today.

Chorus

Lovin you and me underneath the tree it will be
Oh so cudley forever
It will be so right ridin' through the night holdin' tight
It will be so right.....
