(first verse)

i remember each flash, as it all began to blur,
like a memory dieing down, the skys began to
embrace,

i remember each moment i couldnt breath,
and this lightning stopped my heart all in one,

and your all that i see,

so, tell me,

(chorus)

did i die just to realize my past,
did i see the future, see it so fast,
its all a blurr to me, as you can see,
and im burning inside, burning inside,

did this whole thing happen for a reason,
will it change the world, in less time then a season,
was it all a mistake, a worthless death,
because all i see, it what i mean,
to make it alright,
I Died Tonight

(second verse)

all around me i heard, the crys of dieing people,
like a war had broken out, why did i feel this whole,
am i the only one alive, did everyone else fade?
the only reason i would have left, is what i gotta say,

and your all that i see,

so, tell me,

(chorus)

did i die just to realize my past,
did i see the future, see it so fast,
its all a blurr to me, as you can see,

and im burning inside, burning inside,

did this whole thing happen for a reason,

will it change the world, in less time then a season,
was it all a mistake, a worthless death,
because all i see, it what i mean,
to make it alright,
I Died Tonight

(third verse)

so just drop dead, under the sky, and watch me cry,
just hold on to the memories their all i need,
just fade away, fade to grey, fade right before me,
and i wont let you go, ill keep holdin on,

and your all that i see,

so, tell me,

(chorus)

did i die just to realize my past,
did i see the future, see it so fast,
its all a blurr to me, as you can see,
and im burning inside, burning inside,

did this whole thing happen for a reason,
will it change the world, in less time then a season,
was it all a mistake, a worthless death,
because all i see, it what i mean,
to make it alright,
I Died Tonight

I died tonight,
I died tonight,
I died tonight,
I died tonight,
Irs all over tonight....
