"Silver Bullet Strait Through The Heart"

Visit "[Silver Bullet Strait Through The Heart](#)" on MotoLyrics.com

lies lies your all full of lies,
a hidden mask, strait from a disguise,
im gonna guess, you got a better side,
ill watch, and find out where you hide, where you hide

ill figure out, how much you know,
ill show you, the blank white road,
ill take you, past the guarding ropes,
down the slope....

because ill, do it, out of habbit not out of forcement,
ill show you, ill show you what i know....

(chorus)
im not gonna change
im just gonna rearrange
and im not gonna give in
im just gonne be there till the end
ill show u how i work
ill show u how much it hurts
and theres one thing thats gonna tear us apart,
a silver bullet strait through the heart

these things happen for a reason,
it never goes past a season,
ill try and give in to reason,
ill show you everything from each and every season,

ill teach you, the ways that i go by,
ill teach you to spread your wings and fly,
ill teach you to reach for the sky,
and chase your stupid dreams...

because ill, do it, out of habbit not out of forcement,
ill show you, ill show you what i know....

(chorus)
im not gonna change
im just gonna rearrange
and im not gonna give in
im just gonne be there till the end
ill show u how i work
ill show u how much it hurts

and theres one thing thats gonna tear us apart,
a silver bullet strait through the heart

i bet you already figured it out,
so im left with the disbelief and doupt,
im left in the dust to pout,
just to spread my leaves and sprout...

because ill, do it, out of habbit not out of forcement,
ill show you, ill show you what i know....

(chorus)
im not gonna change
im just gonna rearrange
and im not gonna give in
im just gonne be there till the end
ill show u how i work
ill show u how much it hurts
and theres one thing thats gonna tear us apart,
a silver bullet strait through the heart

(chorus)
im not gonna change
im just gonna rearrange
and im not gonna give in
im just gonne be there till the end
ill show u how i work
ill show u how much it hurts
and theres one thing thats gonna tear us apart,
a silver bullet strait through the heart
