"August"

Visit "[August](#)" on MotoLyrics.com

It means so much to me that you would say I'm on your
mind,
I wonder back to when to when you were so often on
mine,

I know but I learned I can't afford to waste any more of
your time,
I heard a rumor and I search to find,

*Chorus

We played along (we played along)
We played along (we played along)
We played along

We played a long time
*

It warms my heart to see you cry resting your head
against a steering wheel,
I guess the love I craved has been made real

We take a road or make a path that leads us,
somewhere
We might stay we might leave, but we can say we've
been there

*Chorus
