Sometimes when im not feeling good
I will say certain things that won't lighten the mood
like I'm angry or something well sometimes I am
but I feel like Im trying to be funny instead

I cant help but think that you dont understand
that is why most of the time you wont see me ive ran
but you must follow me for this song is my plea
and I dont want to upset anyone but me

Cuz I get off, by saying words that never really make
sense
Cuz I get high, when someone feels like treating me so
low
Its a blow that I must defend, even if you're a friend
If (someone feels like treating me like) x2

Sometimes I feel like kicking your ass but I dont want to
embarass,
and I got class
I'll do something else with a different click
You make me, Sarcasmic.

If you hear something that Ive said
Please ignore what it was otherwise hope your dead
Oh im sorry thats mean oh I wont say it again
Were you feels so hurt oh I apologize then

I cant help but think that you dont understand

I'm feeling sarcasmic, you dont know what I'll pick
to say to you...
I'm feeling sarcasmic, not quite like orgasmic
more like F U...
