Im building a doorway now  
and putting a fire in it  
inside the portal appears  
I wonder if I should get in it  
I step inside, particles collide  
I feel like im traveling to a different world

Wait, should I step outside, wait, should I go back  
inside  
I feel like it is sucking me in

I will see you in MineCraft Hell  
theres nothing here from what I can tell  
I'll wait for you in MineCraft Hell  
no one can hear us or hear our yell

I see something in the air  
it seems to draw in closer  
I cant help but stare  
there is a sudden glare  
its throwing fire at me  
I try to run away  
everythings on fire around me  
and I cant get away

Wait, maybe I can kill it, wait, so I turn around  
They've multiplied by the dozen and I can't get out

I will see you in MineCraft Hell  
theres nothing here from what I can tell  
I'll wait for you in MineCraft Hell  
no one can hear us or hear our yell

Throwing fireball creatures  
Setting fire to your features  
if you see one then you're dead  
you wish you had run instead

I found my portal  
and I step on through  
I find im somewhere else

no where near before  
Did i travel far?  
Where did I come from?  
Should I go back inside? x 2

Wait, should I step outside, wait, should I go back  
inside  
I feel like it is sucking me in

I will see you in MineCraft Hell  
theres nothing here from what I can tell  
I'll wait for you in MineCraft Hell  
no one can hear us or hear our yell

I will see you in MineCraft Hell  
theres nothing here from what I can tell  
I'll wait for you in MineCraft Hell  
no one can hear us or hear our yell

Throwing fireball creatures  
Setting fire to your features  
if you see one then you're dead  
you wish you had run instead

Throwing fireball creatures  
Setting fire to your features  
if you see one then you're dead  
you wish you had run instead

MineCraft Hell!
