I'm coming on to something, I know that I can't take this
it happens every night and I don't want to see them
anymore
No I don't x4

I take a torch where I go, maybe a bow and arrow
it happens every night and I can't take this

Zombies inside my house
they're going to eat my brains out
they'll sneak up on you and they'll rip your legs off
Zombies always at night
they're going to wait at your door
They'll wait for you and they will eat your heart out

I think there's one behind me, I heard a breathe inside
me
I turn around and there is no one there anymore
Anymore x4

I take a torch where I go, maybe a bow and arrow
it happens every night and I can't take this

Zombies inside my house
they're going to eat my brains out
they'll sneak up on you and they'll rip your legs off
Zombies always at night
they're going to wait at your door
They'll wait for you and they will eat your heart out

Zombies inside my house
they're going to eat my brains out
they'll sneak up on you and they'll rip your legs off
Zombies always at night
they're going to wait at your door
They'll wait for you and they will eat your heart out
