"Better View"

Visit "[Better View](#)" on MotoLyrics.com

Go to sleep, go to sleep, go to sleep,
You need it more than me
The season changed, but we're the same,
And where we were standing
There's a better view,
There's a better view!
Tell me, tell where you've been?
Where you travelled who are your friends,
You don't need a place to go
Just to call your home!

Chorus:
There's a better view,
There's a better view,
From where we are!
A better view from where we are,
A better view!

In this town all feelings found and found their game,
Did it stop or did it end,
We used to all be friends.

There's a better view,
There's a better view,
From where we are!
A better view from where we are,
A better view!
There's a better view,
From where we are!
There's a better view,
From where we are!
A better view from where we are,
There's a better view,
From where we are!
Something I can't forget,
We used to all be friends.
