Paris is burning
The city alight
the club kids on fire
they're doing it right
they're keeping it punk rock
they're keeping it tight
ripping out speakers
and pumping hi-fi

A higher love that rises above
Rises above yeah a higher love
See the silver set beneath the stars
a hundred million voices that cry as ours

The hoods are all right
the climate is rising
pollution is high
you better take cover
get caught in the sights

A higher love that rises above
Rises above yeah a higher love
See the silver set beneath the stars
a hundred million voices that cry as ours

to rise above it all above our hearts
she gave everthing everything to me
See the silver set beneath the stars
a hundred million voices that cry as ours

to rise above it all above our hearts
she gave everthing everything to me
See the silver set beneath the stars
a hundred million voices that cry as ours

to rise above it all above our hearts
she gave everthing everything to me
