Take the motorway to the ocean I've made up my mind
Bring me to the place where you're hiding from all the
bumps in the night
Send me a postcard from your own heart of all the
things that you see
And in your memories your philosophies are not afraid
to be free

Come back to the start again the start is your only
friend
And time wont hold you down

Just say it out loud everyone's in everyone's out
You never slow down with stars in the skies
Stars in your eyes just say it out loud

Across the state line where the sun shines I fall asleep
in the grass
I wont forget the sights a thousand flying kites heading
straight for the palms

And back to the start again the start is your only friend
And time wont hold you down

Just say it out loud everyone's in everyone's out
You never slow down with stars in the skies
Stars in your eyes just say it out loud
Everyone's in everyone's out
You never slow down with stars in the skies
Stars in your eyes just say it out loud

In the night the streets are out of sight
Overhead illuminated signs wont come down
'cause they're waiting for us

To say it out loud Say it out loud
To say it out loud Say it out loud
To say it out loud Say it out loud
To say it out loud Say it out loud
