I would give everything  
To give nothing more  
I would give everything  
To give nothing more

Walk outside you're standing in the rain  
Eyes collide we both know i'm to blame  
See me cry feel like judas for awhile  
Absolution i'm feeling so tired

Bygones by you took away the blame  
This humanity haunts me  
Everyday i feel ashamed

How long till everything is new  
How long till our bodies are renewed  
How long till we see you face to face  
How long till we reach that perfect place
