[Mr. Skurge]

My weapons of elimination  
Dispersed first and of the earth  
To say goodbye  
The sound of war doves cry  
Bring a controled urine  
And tears for I  
Open the amount of drought  
Days run dry  
But my focus is like raining  
Rappers decapitating gods  
Move slow with the  
Eye on prize  
Not worried about the other  
Shotguns, fruits of my labor  
Soon to be sun-dried or deep-fried  
Whichever one hurts more  
I'm still to decide  
Homeboys and beats will be denied  
No eat to the days  
No room to get high  
(pump motherfucker) The sky's the limit  
I rethought my situation I'm not ready to die  
Like the late great even though  
I think about it half-baked sitting on my bedside  
Sometimes suicide  
I realized the mission ain't  
Over me, a covert commander  
Search for infinite  
Till the time they read miranda rights  
These days he roams free  
Waiting to get one in his sights  
Maybe one day  
My radio or gun play  
Until that day  
We stay beneath the surface  
Everyone stay beneath the surface  
Everyday every one day everyone say

[Chorus] - (2X)

All snakes bite even though

All poisons don't affect you  
I seen to many anxious rappers  
Grabbing mics like homosexuals  
Grab dicks I prick my finger  
Made the blood oh...  
We toasted Hip Hop a long time ago  
It ain't no secret

The beacon was visible  
I came to the light thinking that being invisible  
Might do some things that make our parents proud  
Thought should have been broadcasted out loud  
Now I wear a shroud of anger plus I'm a little stranger  
Now that I'm used to being a pest  
I haven't lost my sense of direction  
Or found my place at last  
Spending time in my room  
Pouring out thoughts on pads  
Like a chemist with a flask  
Designing a drink  
To cure my own self-affliction  
Turn to grim affliction  
If you got some beef meet me at the benediction  
Until then keep slivering  
And I'll keep wishing

[Chorus] - (1X)
