One, two, three, four

Walking through the cross fire heart  
Feeling heavy and hopeless and  
Wonderin' how I ever will see through this darkness  
Every drop of blood can be so beautiful  
And I sure was bleedin' the drops by the bucketful

I have the strength to endure and all the love so pure  
I have the strength to endure because, because

I'm not afraid to tell her just how things work  
I ride a hurricane through the fast lane  
Always lookin' over my shoulder  
She said, "There's somethin' about you  
And neon lights always glow hot  
Baby we can see this through  
Just give me all the strength you've got"

I have the strength to endure and all the love so pure  
I have the strength to endure because, because

I have the strength to endure and all the love so pure  
I have the strength to endure because, because

I'm not afraid to tell her just how things work  
I ride a hurricane through the fast lane  
Always lookin' over my shoulder  
She said, "There's somethin' about you  
And neon lights always glow hot  
Baby we can see this through  
Just give me all the strength you've got"

I have the strength to endure and all the love so pure  
I have the strength to endure because, because

I have the strength to endure and all the love so pure  
I have the strength to endure because, because, yea  
hey!
