I was probably crying  
Downcast on the way back.  
Although I was always close by  
I couldn't say a thing?

As I walked  
I took the short cut by crossing the park.  
I kind of knew already?

? The shadow stretched across the ground  
Even I know, the shape of happiness.

"We'll always be together"  
That's what you said?  
"Even when there's love, there's always  
Sadness nearby, hiding"  
You laughed as you talked.

If there really was such thing as a hero  
I thought you might have a problem with it?

? The shadow stretched across the ground  
Even I know, the shape of happiness.

We can't always be together,  
So you can't live on by always accusing...  
Because you repeat the same mistakes  
Over and over.

? The shadow stretched across the ground  
Even I know, the shape of happiness.

Now I've started walking?  
It's going to be alright
