

The New York Room **"Black Light"**

Visit "[Black Light](#)" on MotoLyrics.com

in the black light

no shadows will fall

in the black light

is darkness made flesh

in the black light

screams become skin

in the black light

dreams become wings

in the black light

without color

in the black light

we will hide all night

in the black light

we are safe inside

in the black light

we will have no lies

in the black light

no one will die

in the black light

without color
