Once upon a time, a boy meets girl  
Mad in love, against the world  
Happy everafter, and that was just because  
They had hearts of gold and stars in their eyes  
Never made a fuss of where's and why's  
Filled the days with laughter  
...now why can't that be us?  
What's Up with you and me, is it a fantasy  
Something I feel so strong - I can't put my finger on  
What's Up with you and me, are we still meant to be  
Or will you be the one I can't put my finger on  
Once upon a time I thought we'd be  
The greatest of loves in history  
And I've been waiting for you  
But I guess you missed the bus  
Now there is still time to make it right  
Leaving the past behind tonight  
Does anyone know the answer  
To why it isn't us?  
What's Up with you and me, it's such a mystery  
Something I feel so strong - ....  
What's up with us  
Can you tell me  
What's up with us  
It should be easy  
Is it because  
You wanna tease me  
Or is it the way you play  
What's Up with you and me...
