Yo, let me start off by first apologizing
Girl, you think I take you for granted
But um
I'm here to take it back

Can we pull back a minute and make believe that?
I don't know you and you don't know me
Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been?
Just tell me where and I'll kiss it again
Darling, let's pretend
This old school love is brand new

I know I shouldn't have to ask
But it seems that I've relaxed
And I'm getting the feelings that
It's time I take it back

[Incomprehensible] night escapes
In the car callin' out my name
You being scared when your friend was late
Then being cool when it finally came, those were the
days

Can we pull back a minute and make believe that?
I don't know you and you don't know me
Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been?
Just tell me where and I'll kiss it again
Darling, let's pretend
This old school love is brand new

Way back when hickies were the thing
You wore bloomers, not that sexy G-string
And gettin' blue balls was a daily thing
But it was alright, with me

To when that very first time went down

How you moaned when I went down
You were the one, I had no doubt
We need to get that back right now 'cause those were
the days

Can we pull back a minute and make believe that?
I don't know you and you don't know me
Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been?
Just tell me where and I'll kiss it again
Darling, let's pretend
This old school love is brand new

We're still here
'Cause we conquered every feeling
The fire burns inside like yester year
My baby since back in the day

We knew it would be us
Holding on to that first crush
Had to say today, is what it was
So let's keep on sending, it's only beginning

Can we pull back a minute and make believe that?
I don't know you and you don't know me
Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been?
Just tell me where and I'll kiss it again
Darling, let's pretend
This old school love is brand new

Can we pull back a minute and make believe that?
I don't know you and you don't know me
Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been?
Just tell me where and I'll kiss it again
Darling, let's pretend
This old school love is brand new

Back, like Cadillacs and hubcaps
Back, like leavin' letters in your nap sack
Back, like Jellies and pro keds
Back to girl, when we first met

Back, to when Mike had the glove on

Back, to when our love was so strong
Back, to the days I know you miss
I'll give back, I promise this

Can we pull back a minute and make believe that?
I don't know you and you don't know me
Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been?
Just tell me where and I'll kiss it again
Darling, let's pretend
This old school love is brand new

Let me explore the places I've already been?
Tell me where and I'll kiss it again
Darling, let's pretend again, let's pretend
Baby, I wanna just love you, I wanna love you
I wanna love you, [Incomprehensible] you,
[Incomprehensible] you
That's all I wanna do, baby
All I wanna do, love
