A sudden violent sensation descends
It may be aimed at you
Cause baby
I've learned what I could never do

You've had enough time to say your goodbyes
Now that the waiting's thru
I have a weapon and the reason too

You've now got a ton of pain to carry through
This is the end no future then for you
Taking your hand move back to the beginning
If you believe you're strong enough

Laughing out loud as you run for your life

I may be laughing too
but maybe...
Maybe not if I were you

When it's forever you're forever bored
I'd rather be confused

You've now got a ton of pain to carry through
This is the end no future then for you
Taking your hand move back to the beginning
If you believe you're strong enough
