Long walk home from here
And it's a long walk home
It's a long walk home from here
But it's never been too long for you
It's a long walk home
Like real long
It's a long walk home from here
And it's like real

Don't try to lie or disguise
Your overwhelming surprise
Your desperate eyes
Rely on your friend's bad advice
And I hope your cries don't mean goodbye
I'm still the only guy
That's standing by your side

I never thought tonight

I never thought tonight could be
This hard on us
Now I know that this is my time

Maybe someday you'll come back home
And we'll be friends again
We'll get to talking about times
Long forgotten
When friends say no when you say yes
They're only looking out for the best
Way to success

I may not have a with words
But I have a way with you
Oh no
