This world is comfy
Nice tone and pleasant weight
We fit together
We've met our mate
In the right direction going much too far
I don't wanna be your wanna be your star

You make my heart beat
I want to draw you in
You act as though you like me
I'm wonderin'
Never been so happy going much too far
I don't wanna be your wanna be your star

Says in the paper
that love is just a myth
Chemical reactions
You can't do nothin' with
. you make my heart beat
I don't wanna be your wanna be your star
I don't wanna be your wanna be your star
