Cause you ain't like these other girls
I could tell you're one of a kind

[Chorus]

Can't let you get away, let you get away, let you get
away, shout it

I'm here to stay, that's why I can't

Let you get away, let you get away, let you get away,
shout it

I'm here to stay, that's why I can't

Baby girl, just hear me out, I'ma show you what this
love thing's all about

I see you rocking your hips, looking your lips, do you
think about me? You're showing that

I know you're feeling my swag and I'm feeling your
style

Basically we just go but wow

Travel around the world like a pasta how, how?

We can get it in like some wild juvenile

I'ma clean my space and rock this place

I can rewrite do that poker face

I've been so fly silk and lace ...

So tell me have you seen her? Guess she look like she's
Keisha

Make say was some Cristina and Serena

Now give me an ear, I gotta tell you something

I can't find what I really want it

You run through my mind, let's forget the junction

Cause you're so fine, I could merely function

[Chorus]

Can't let you get away, let you get away, let you get
away, shout it

I'm here to stay, that's why I can't

Let you get away, let you get away, let you get away,
shout it

I'm here to stay, that's why I can't

Let you get away, let you get away, shout it

I'm here to stay, that's why I can't

Can't let you get away, let you get away, let you get

away, shout it
I'm here to stay, that's why I can't

Now baby listen, you know I'ma stay if I hit

And you physically fit when you're stretching them legs
... I need ya

That ain't no me for trip it, so just tell me what the deal
is

Cause I got a disease and baby you got the
prescription for my sickness

I won't get too specific, but you know what I'm
intending

And I'm feeling your vibe, I'm feeling your style
So baby girl, give me your digits

So tell me have you seen her? Guess she look like she's
Keisha

Make say was some Cristina and Serena

Now give me an ear, I gotta tell you something

I can't find what I really want it

You run through my mind, let's forget the junction

Cause you're so fine, I could merely function

[Chorus]

Can't let you get away, let you get away, let you get
away, shout it

I'm here to stay, that's why I can't

Let you get away, let you get away, let you get away,
shout it

I'm here to stay, that's why I can't

Let you get away, let you get away, shout it

I'm here to stay, that's why I can't

Can't let you get away, let you get away, let you get
away, shout it

I'm here to stay, that's why I can't

Babe, I escape ... stay and maybe I'm insane

Just can't let you get away

Let you get away, let you get away, let you get away,
shout it

I'm here to stay, that's why I can't

Let you get away, let you get away, shout it

I'm here to stay, that's why I can't

Listen baby, listen baby.
