Yeah, Oh Oh

(Utopia)

I hate to be the one who burns the bubble

Girl this is real

We're deep in trouble now ( now, now, now )

No way to change

That love is dying

Without of word, or feelin' and tryin' (?) now ( now , now  
, now )

I'm ready to go

And you just close your eyes

Don't see, we gotta perfect situation

We just avoided every confrontation (no...no...no)

We're living in Utopia ( Utopia )

We got pain on the complication

I think , we hit the final destination now

(now...now...now)

We're living in Utopia ( Utopia )

You keep on smiling

Looking unaffected

We seems so close

Yet's so disconnected now (now...now...now) (?)

Oh, no, no

I wanna scream but there's no receiver

Am I a fool

Then you can would be the now (?)

You don't even know

'Cause you just close your eyes!

Don't see, we gotta perfect situation

We just avoided every confrontation (no...no...no)

We're living in Utopia ( Utopia )

We got pain on the complication

I think , we hit the final destination now

(now...now...now)

We're living in Utopia ( Utopia )

I feel left behind  
I wish that would real  
But is only your mind  
Are you ( Are you )  
Just afraid ( Just afraid )  
To faces the reality  
You've chose turn away ( turn away ... turn away )  
'Cause you just close your eyes!

Don't see, we gotta perfect situation  
We just avoided every confrontation (no...no...no)  
We're living in Utopia ( Utopia )  
We got pain on the complication  
I think , we hit the final destination now  
(now...now...now)  
We're living in Utopia ( Utopia )  
It's just can't go on  
Don't see, we gotta perfect situation  
We just avoided every confrontation (no...no...no)  
We're living in Utopia ( Utopia )  
We got pain on the complication  
I think , we hit the final destination now  
(now...now...now)  
We're living in Utopia ( Utopia )

Utopia ... Utopia .... Utopia
