

Nick Black "Beside You"

Visit "[Beside You](#)" on MotoLyrics.com

So, this is how it ends, & you know...
I can't be just your friend
And you're seeing...
This is not how you thought it would be
And you cannot pretend now...
Why? Why?
All of the stars fall from the sky.
I never meant to see you cry.
When it's all been said & it's all been done
You find yourself & you need someone.
You'll see me there...
Beside you.
How, oh how can I go on, knowing now...
Could this feel so wrong?
And I'll be there,
Somewhere in your heart
Even though we're forever apart, now...
Why? Why?
All of the stars fall from the sky.
I never meant to see you cry.
When it's all been said & it's all been done
You find yourself & you need someone.
You'll see me there...
Beside you.
It's funny how you're the one who said
"You're never gonna leave me".
It's funny how you're the one who said
"You'll never ever be alone".
And there you left me on the floor
Feeling like I'm bleeding...
You'll still be the only one.
All of the stars fall from the sky.
I never meant to see you cry.
When it's all been said & it's all been done
You find yourself & you need someone.
You'll see me there...
Beside you.
