

Mimicking Birds "Burning Stars"

Visit "[Burning Stars](#)" on MotoLyrics.com

So, this eve'n it seems we have settled down
Quite a bit from the energy we once had
Oh, believe me, we've settled down
Way down, way down, way down.

Oh, the time it takes til you've had enough
Has shortened even in the last couple of years
So too have the years themselves
Themselves, themselves, the years themselves

And all we are, is burning stars
Shining brightly making sure you dont float too far
I'll keep an eye on you if you keep one on me
And then what happens we'll see
And then what happens we'll see

All we are, is burning stars
Shining brightly making sure you dont float too far
I'll keep an eye on you if you keep one on me
And then what happens we'll see
And then what happens we'll see

[instrumental]

And all we are, is burning stars
Shining brightly making sure you dont float too far
I'll keep an eye on you if you keep one on me
And then what happens we'll see
And then what happens we'll see

And all we are, is burning stars
Shining brightly making sure you dont float too far
I'll keep an eye on you if you keep an ear to me
And then what happens we'll see
And then what happens we'll see
And then what happens we'll see
And then what happens we'll see
then what happens then what happens
then what happens then what happens
then what happens we'll see
