She's got the fear to be alone
But she knows that she wants
I'm so sick to hear "maybe"
But she's gonna fly with me

Grab me and show me your flame
Accelerate and move on this way
Grab me and show me your flame
Accelerate and move on this way

Now she rides me in the way she wants

She's not closed on her own
Goes up and down on my love
Little sister I'll give you more

Grab me and show me your flame
Accelerate and move on this way
Grab me and show me your flame
Accelerate and move on this way
