Shut the windows
Shut the doors
Bring the walls down
Break the floors

And now the band
Plays it loud
Let our words
Fill up the clouds

The rain, it falls
The rain it falls
So why say anything at all?

Thanks for coming
To the show
We'll make it rain
We'll make it snow

We'll drown the thunder
And the light
We'll bust your thirst
And save your life

The rain, it falls
The rain it falls
So why say anything at all?

So why say anything
So why say anything, yeah
So why say anything at all?
