Verse

You were the one who said that I'd amount to nothing
You were the one who put me down
You tried hard to swallow me in your shadow
Now I don't want you around

Pre Chorus

You're trying to steal this ride I'm on
To realize your own dreams
Squeezing out every drop of fortune
Clouding stars so I can't see

Chorus

This is my farewell
This is my goodbye
Just go away
Cause I don't need your kind
This is my farewell
This is my goodbye

Just go away
Cause I don't need your kind
No I don't need your kind

Verse

You were never a friend before
Now you're clinging on to me
Opportunities are walking through my door
And you're sucking me dry like a leach

Pre Chorus

So I'm shutting every window locking, every door
There won't be a time when you can call on me
I'll shout ugly words you've heard before
You're just the kind that I don't need
