Was my life just a bad dream
or did I lose my reality?
You ruined it all, now heal me
As I may still have the chance to be free

Robbed of every emotion
My life's a fucking infection
Since all I had and loved seems disappeared
not getting back what I lost is my biggest fear

In every moment, in every instant... your violence
surrounds me
In every moment, in every instant... your violence is
inside of me

18 years...

It's been so long but I survived
Stuck in hole for a lifetime
I wondered if I was alive
Although it's over I still feel

In every moment, in every instant... your violence
surrounds me
In every moment, in every instant... your violence is
inside of me

And now I'm free in the prison of my memories
but I'll never know what I'd have become
