"Venom Of Life"

Visit "[Venom Of Life](#)" on MotoLyrics.com

First you feel burn, then you feel pain, now you feel
nothing
Why am I suffering for you?
Destruction, illusion, I'm in a prison of fusion
And the blood drains from my hands

Why?
The venom's in my veins, how can I get away all of my
pain?
This is the venom of life

In the silence, it brings you down in the darkness
You can't think now that you're dead
It destroys you, it removes your memory
And there is nothing left to do

Go

Voices, visions, noises from outside
I can feel the passage of Death
Now it's begun my last fight
I hear crying, am I already dead?
Looking inside your eyes
And I can't explain

I hold your hand and I guide you on this path
I know where we're going, you haven't an idea
In this cold embrace of icy winds, we are searching
For salvation, together

You killed me with your sick words
You killed my soul and killed my own
I injected you my venom of life
Will you remember me now?
Will you remember me now?

How?
The venom's in my veins, how can I get away all of my
pain?
This is the venom of life

In the silence it brings you down in the darkness
You can't think now that you're dead
It destroys you, it removes your memory
And there is nothing left to do

Fuck

Voices, visions, noises from outside
I can feel the passage of Death
Now it's begun my last fight
I hear crying, am I already dead?
Looking inside your eyes
And I can't explain

I hold your hand and I guide you on this path
I know where we're going, you haven't an idea
In this cold embrace of icy winds, we are searching
For salvation, together

You killed me with your sick words
You killed my soul and killed my own
I injected you my venom of life
Will you remember me now?
Will you remember me now?
