Struck by lightning my heart's on fire  
Woke me like the wind in the middle of the night  
tossin'and turnin'

It came right out of nowhere. without me ever knowing  
This thing we got is really goin' somewhere  
Suddenly love is in the air. It came right out of nowhere

Lost and lonely were my best friends, they just left me.  
Love and lucky been chasin' me down. Gonna let them  
catch me.

It came right out of nowhere. without me ever knowing  
This thing we got is really goin' somewhere  
Suddenly love is in the air. It came right out of nowhere

Ain't it funny the moment I stopped looking  
How you found me.  
(How you found me)  
I know it's crazy, but I can't live without your arms  
around me - yeah

It came right out of nowhere without me ever knowing  
This thing we got is really goin' somewhere  
Suddenly love is in the air. It came right out of nowhere

Came right outta nowhere
