Break down, we've got to make them see
No discussions we are unnegotiable
Stay low, rise to the sacrifice
From this moment the conflict is glorious

Stand tall, the honor of men prevail
We will always avoid the collateral
Attention, lean to the discipline
This machine that we've built is victorious

We fight, domination through this war
Engage, our worlds will soon collide
Conquer, we will be in control
In the age of rage!

Expel, we gotta take them out
We will show that defeat is not possible
Exclude, the essence of evil deeds

Betrayal and blood in the sun we're victorious

We fight, domination through this war
Engage, our worlds will soon collide
Conquer, we will be in control
In the age of rage!
We'll see you through this war
We eliminate your rage

We fight, domination through this war
Engage, our worlds will soon collide
Conquer, we will be in control
In the age of rage!

We fight, domination through this war
Engage, our worlds will soon collide
Conquer, we will be in control
In the age of rage!
