Translation

It's so very easy
for youth to forgive everything
I called in the rescue squad
So
please kiss me
please kiss me
ALL NIGHT (x3)

The scar on your right eye is painful,
when you're trying to remember.
Since then you've searched for victory
You aren't alone or weak, you are better, a monad to
me

Is it a fallen angel's magic, or a mischievous monster's
prank?
Before we get bored
Let's let go of that
bowling ball.
We lead such strange lives.
Accept it, but yet..
We want to smash it, but we can't, it wont happen like
before

Everything is finally just the way it should be
Your betrayal, Teacher left a problem
Now immediately
please kiss me
please kiss me
ALL NIGHT

Empty, Ideal, Mistaken, so much love is called
Everything we do is stupid, let them laugh

Struggling to the other side, to find that one

The foreign material exists
I agree that there is a tear, but
I won't let that alter my story

Such consent

Is it a fallen angel's magic, or a mischievous monster's
prank?
Set up now directly
Empty, Ideal, Mistaken, so much love is called
Everything we do is stupid, let them laugh

Let's let go of that
bowling ball.
We lead such strange lives
I Agree, yeah?
We're gonna break...
All the suffering you've brought to me, to leave behind
is all so sweet
Keep exceeding it
Cut through the inner turmoil, with the one feeling
I've Broken it
