Verse 1

Say I, did not, see what I just saw you do
Don't give me that, don't act like I don't have a clue
I watch your move, so smooth,
You got her I'm wantin' you
You speak the same words that I've heard
I know what you're tryin' to do
If you're gonna be like that
Then take a walk, don't wanna talk
You know what I'm sayin'
If you wanna be in my life
Then think twice , cos there would be
No compromise

Chorus 1

If you think nothing would change
I would love you anyway
If you think you can betray me
And pretend
Think again
I have wised up to your ways
I know all your shady games
If you think that I would stay
Till the end
Baby think again

Verse 2

Tell Me the truth
Did you, or didn't you
Cos forgive and forget
Are not in my alphabet
If you're gonna be like that
I expect some respect
You know what I'm saying
Never be a second chance, make it last
Cos baby, I'm not playin'

Chorus 2

If you think nothing would change (Would change)
I would love you anyway (I would love you anyway)
If you think you can betray me

And pretend
Think again (Oh think again)
I have wised up to your ways (Wised up baby)
I know all your shady games (All your shady games)
If you think that I would stay (Would stay)
Till the end
Baby think again

Bridge
If you wanna be the only one
You can't undue what's been done
So tell me I'm right,
I would see it in your eyes
If you like, then get to know
My otherside

If you think nothing would change
I would love you anyway
If you think you can betray me
And pretend?oh think again

Chorus 1
If you think nothing would change
I would love you anyway
If you think you can betray me
And pretend
Think again
I have wised up to your ways
I know all your shady games
If you think that I would stay
Till the end
Baby think again

(If you think nothing would change
I would love you anyway
If you think you can betray me)

Till the end
Baby think again

(If you think nothing would change
I would love you anyway
If you think you can betray me)

Till the end
Baby think again
