"Shadows"

Visit "[Shadows](#)" on MotoLyrics.com

I've been given more chances than I really think I
deserve
I figured I'd be hurt, I'm pretty sure I need work
But these words yeah, they're holding me
Before that fact there's no consoling me
We're controlled to be another lonely seed

Giving birth to the life, we devoted, week
We can't move without testing grounds
And now we can't be found

The shadows pull me down
But they know they'll never take me, take me
I'm already found
And I got one life to live for

Shadows pull me down
But they know they'll never take me, take me
I'm already found
I got one life to live for

I got one life to live for
I got one life to live for

Dark clouds and dark towns consume me still
Figured I'd get control if I'd consume this pill
Is it fake or real, I can't take the thrill
Of wondering what's left in this brain to kill
The pain is still but emotions turn
This shadow has been cast on the past that burns
Now at last, my turn to break the grasp and learn
Who controls the future, it's mine to earn
Let's go

The shadows pull me down
But they know they'll never take me, take me
I'm already found
And I got one life to live for

Shadows pull me down
But they know they'll never take me, take me

I'm already found
I got one life to live for

I got one life to live for
I got one life to live for

Shadows pull me down
But they know they'll never take me, take me
I'm already found
I got one life to live for

Shadows pull me down
But they know they'll never take me, take me
I'm already found
I got one life to live for

Shadows pull me down
But they know they'll never take me, take me
I'm already found
I got one life to live for

I got one life to live for
I got one life to live for
