"Cure"

Visit "[Cure](#)" on MotoLyrics.com

Need some cure for this disease, I've been curse with
love
My visions bleed, my memories, of all the times we
spent
Now I'm left with only me, and my body's feeling weak
I can't believe I didn't see, this moment come so fast

You've been swimming through my vi, vi, I need a
dream, dream, dream
To cure the pain, pain
I need that someone to replace, place, place
She needs to clear, clear, clear, my mental space
Now it's over, baby girl it's over
I need a cure, to wash my past, all away
Cause it's over, my mistake to chose her
Need a cure, to wash the past, all away

I let your soul inside of me, and your pain refuse to
leave
It's hard to leave when memories refuse to fade away
Won't stop when you shut the door, all my never... go,...
go

You've been swimming through my vi, vi, I need a
dream, dream, dream
To cure the pain, pain
I need that someone to replace, place, place
She needs to clear, clear, clear, my mental space
Now it's over, baby girl it's over
I need a cure, to wash my past, all away
Cause it's over, my mistake to chose her
Need a cure, to wash the past, all away
