

Nightcore "Without You"

Visit "[Without You](#)" on MotoLyrics.com

When I look at the sun
I can feel no warming light
And at night the stars
The only have this bright

When I look at the world
All the colours fade to grey
Baby nothing to say
For another lonely day

I can get no sleep
don't know how to breathe
I feel like I'm falling down
Down underground without you

When I look at my heart
A million tears I've found the pain
Seems like nothing that bored
And every thing has lost in breathe

When I look at my soul
Read the things are uncured
Be without you
Which something I can't pray
