[young jertz]

you see me standing on the moon looking down

standing on the moon looking down

you see me

all over the world world world

all over the world world world

all over the world world world

all over the world world world

[kid ink]

you see me, i know you see me

sitting on the moon, ain't nobody in between me

but the stars. is feeling like i found me a genie

i don't wanna let it go, light it up and let it grow, light it

up and let it blow

and baby, pass that shit, it's a party everywhere and

imma press that shit

yeah you know i am right, higher than the letters

you don't need a fucking rocket tryn' to get upon my

level.

come and get upon my level, i'm controlling your

system

we're chilling in the back like drinking tee

feeling so close but i know i know i ain't no rich.

[hook]

you see me

standing on the moon looking down

standing on the moon looking down

standing on the moon looking down

standing on the moon looking down

you see me

all over the world world world

all over the world world world

all over the world world world

all over the world world world

[kid ink]

i'm dreaming, it feels like i'm dreaming

how we get here so fast? man, we must be speedin'

we probably need to slow down, but i don't think that i

will  
gonna hundred miles running, baby catch me if you  
can  
and we could live it up all night, with the middle fingers  
up  
we can fuck all night, yeah you know it  
girl, gotta bite it like before, it's an epic party telefied  
on me, like a go  
i can't get enough, i need more. gotta do it 40 times,  
40 times i was broke  
gotta deal with 40 times, 40 times they ain't no.  
now all i do is shine, put your change back on.

[hook]  
you see me  
standing on the moon looking down  
standing on the moon looking down  
standing on the moon looking down  
standing on the moon looking down  
you see me  
all over the world world world  
all over the world world world  
all over the world world world  
all over the world world world
