Vice Versa. Feat: MC Acid.

Written by Holy Hustla & Acid.

Holy Hustla: If every thing was vice versa would you say that I cursed ya?

Cause I be praying for my enemies and my haters I blessed ya.

If the world could spin the other way would it be better?

No more hate mail, fines and bills just love letters

A few butterflyâ€™s but no flies

A lot of loving eyes but no lies and no spies.

If I turn back the hands of time would it be fine

Cause these cats be holding guns and 50 got nine holes

Ladies in the ghetto makin money as hoes

I ainâ€™t on nothing funny but I keep on praying for those.

People saying theyâ€™re God, they ainâ€™t God, they donâ€™t even know God

The only way to God is through Christ it was written.

Ill rhymes and composition

People getting vexed so easy, they keep on switching.

We need vice versa

No I never cursed ya

Yeah I always blessed ya

Cause you are my homie

So letâ€™s reverse the curse we need to fix this broken earth

God created blacks and whites so squash the beef, why the segregation

It still goes on today even in this multicultural X Christian nation

We see innocent people through the window pains

But terrorists wanna kill em all crashing into them with airplanes.

Africaâ€™s a rich land filled with diamonds, gold and rubies

Geographical knowledge, cultural back ground and natural medicines

But some men donâ€™t want it so they hide it in the back of their pockets and bring out the bad sides such

as fanning, HIV and Aids.
2004 years Jesus Christ died on the Cross for our sins
so the price has already been paid.
Teens getting laid in the back of a car that's going
to far
Pedophiles working on line taking little girls to the bar
and after!
No more drama
No need for no armor
Much love with no pause and no comma.
We gotta stop the war in the Middle East
Or resist the mark of the beast at the least
Cause the end times are drawing closer
M.J wrote a song "Heal the World"
Wanna change the world take a look at the "Man in
the Mirror"
Wanna change the world then change your life
Cause the revolution starts in the heart
Vice versa.
