I feel like I know just what you like
So let tonight let's sail away and leave them all behind
Cause this world is medium twiddle dumb implied
When there's nothing about you that's typical
I think I fell in love twice

(Chorus)
So try my trampoline set you free
Never come down
Fly my airplane away with me
Never come down
Climb my mountain can you breathe
Never come down
Because we fall indifferently

And I feel what you feel we don't have to change
I just feel the rhythm in songs and in angels it all takes
me away
I'm on a one way bridge over passion on a 40 Hour
Sunday
I'm hearing tattered tales of heartache that color my
head-strings, finger paints

(Chorus x 2)
So try my trampoline set you free
Never come down
Fly my airplane away with me
Never come down
Climb my mountain can you breathe
Never come down
Because we fall indifferently

Look at all the air under me
