Sometimes I wanna save the world
Sometimes I wanna stay in bed
But the most of the time I'm needing you
Cause It's you that clears my head
Don't even want to say hello, just come and wrap me In
your arms
What if I said you had all of me would you keep me
safe from home

Take me up up up and away
Wanna see the clouds below
Baby say (say) that you'll stay

And who knows
I'll let you be my super...hero
super...hero
Cause we all need somebody who can take us away
Come In and save the day
I'll let you be my super...hero
Super...hero
If It's you then your welcome baby
Make your way
Come In and save the day
Super...

Sometimes I'm feeling like the wind
Like I can blow my clouds away..
And other times I need your sunlight here
Turn my darkness into day
Don't even need to say a word
You see through to the best of me
But if I say I wanna disappear would you
come and rescue me

Take me up up up and away
Wanna see the clouds below
Baby say (say) that you'll stay

I'll let you be my super...hero
super...hero
Cause we all need somebody who can take us away

Come In and save the day
I'll let you be my super...hero
Super...hero
If It's you then your welcome baby
Make your way
Come In and save the day
Super...

Just lead the way and I'll follow wherever you go..
Whenever I'm with you I'm in your control...
Baby your my....

I'll let you be my superhero
superhero
Cause we all need somebody who can take us away
Come In and save the day
I'll let you be my super...hero
Super...hero
If It's you then your welcome baby
Make your way
Come In and save the day
Super...
