I think of when we slow dance in the street  
I gave you one kiss softly on the cheek  
When I bring you in I hope it never ends  
I have my future so safely in my hands

And as we dance in the rain I've never felt this way  
What a rush I swear this is much more than a crush  
It's deep in my heart I'll never depart from you  
I've fallen over the moon  
So deep that it will slip through my skin to show  
I'm all in To the day I die and say goodbye  
Thank you for the ride of my life

I think of when we talk about our dreams  
And how they soon but yet so far out of reach  
This will be worth the wait but  
I can't take the wait for another day

I'm home, I'm not alone You took my hands without a  
plan  
Thank you for taking that chance
