Hey little kid, i was persuaded too
i was trapped like an animal just like you
in a world without perspective
i was trained to be subjective
but inside i was agonizing
i was lashed and whipped around

You could hear that i was petrified by the sound of my
breath
Yeah, by the sound of my breath you could hear that i
was scared

Manipulation. Thanks, white America
from the north pole down to Antarctica
breeding with an agenda - what?
information with intentional deceiving

My mind ran in circles
like a dog fetching his tail
at the bottom
chasing this historical tale
couldn't seem to find the solution
i was all out of appetite to go on like this
