[spoken] "for some of us, maybe just once in our lifetime,  
we find someone very special  
who brings back a little sanity  
into this crazy world we live in  
by just lovin' you"

after all is said & done i've only just begun  
loving you just loving you

for all that i can see  
my tomorrow's they will be brand new  
just loving you  
you helped my through today  
with more than i can say  
it's true just loving you

now i can't shed a tear  
as long as you are near me too  
just loving you  
(instrumental break)

after all is said & done i've only just begun  
loving you just loving you

as i begin to see  
the world has changed for me  
it's true just loving you  
now i do believe  
my tomorrows they will be brand new  
just loving you

"for some of us maybe just once in our lifetime  
we find someone very special  
who brings back a little sanity  
into this crazy world we live in  
by just loving you" just loving you
