Narnia...Narnia...

No one believed her
No one imagined it was true
No one could see her winter haven coming into view
She says she's seen the land beyond
She said she's walked her Babylon
She felt the cold beneath her feet
And time stood still where the winter won't sleep (where
the winter won't sleep)

Chorus

I've seen a new world...like nothing before...just step
through the door right
Into a new world...Into Narnia
I've seen a new world...like nothing before...just step
through the door right
Into a new world...Into Narnia

All hope was fading...(all hope was fading)...a darkness
far beyond their might
But love came crusading on the wings of healing
sacrifice
He gave them something to believe
Came back in all His majesty
He conquered evil through His love and handed them
the land they were dreaming of (love came crusading)

Chorus

I've seen a new world...like nothing before...just step
through the door right
Into a new world...Into Narnia
I've seen a new world...like nothing before...just step
through the door right
Into a new world...Into Narnia

I never dreamed it but it seems that He's alive again
Shaking His mane He's just the same as I remembered
Him
The spell is weakening with every breath He's
breathing in

And when He roars...she can't ignore that He's our king
again

(...There, just beyond the lamppost...)

I've seen, I've seen, I've seen a new world...
Into a new world...Into Narnia

Chorus

I've seen a new world...like nothing before...just step
through the door right

Into a new world...Into Narnia

I've seen a new world...like nothing before...just step
through the door right

Into a new world...Into Narnia

Into a new world...Narnia
