[Slug]

I'm sparked, waiting for the dark to hit
Cause once the moon gets above my apartment
I catch fits for starting shit
I'm smart with it, I give it that special touch when I push
it
Cause I'm also a label rep, and I can't allow no bullshit
So shush kid, shush baby, shut your eyes
Lay your head back, she'd the fear and let the tears
crystallize
I wish the flies to land upon your forehead
When I extract the essence from your head
And leave your body resting in Moorehead
I've left more dead reputations than HIV can
But for every killing there's a reason and it's not just
MC's, man!
I'm watching C-SPAN, waiting for the first state rep
To take the first step, to have me killed off to make this
world perfect
Well lets get shit right, right here, right now, right
away.
Atmosphere motherfucker, if I need to I could fly away
I'll grind you and your weak crew into beef stew
Serve you with seafood
You can't cloud my vision 'cause you're see-through

[Spawn]

You need to recognize the size of the Atmos
You ain't as tall as half this madness past what you
practice
Obviously you can't fuck with my tactics, you bastards
That's why you breath fast bitch - no need to ask

[Slug]

We dug the fingernails underneath the skin of your
scalp, then peeled it
Sent your underdeveloped pre-school style on a field
trip
Now bite your tongue, this is how the mic gets done
A whole tree to pick some fruit from, man,
You had to choose the ripest one

[Spawn]

That said it all, it comes from inside, and how you ride
The sound wire when it's live and the vibes feelin' right
Catchin' the motion given by rhythms when you hit 'em
on time

With lines, makin' sure your rhyme soundin' tight
Your voice should travel without the babble of the
average emcee

So listen please use discretion when you breathe
Sound is vibration, I choose to use it with a vision
And then comes the style and precision...

[Slug]

No more longer will we hold your hand
Why? Cause you're too damn old
Oh yeah, the networks called
They told me to tell you you've been cancelled
They also said big up for all the support
Thanks to your devotion, they now control the world
So let your hair down and eat the poison with a tall
glass of Tang
I'm rising past the bank, with smile I'm flashin' my fangs
I tumble over some, 'cause some I don't over stand
I got the clout from Spawn, from now on, I know the
plan

[Spawn]

It's the noise it makes, that generates the passion I
have
It's the void it breaks, that stimulates when mics get
grabbed
It takes shape - escapes from these vocal chords I have
Atmosphere: music makers from the Rhymesayers lab

[Slug]

Come now, whofi gwan test the giants, when we apply
this
Vice grips to your eyelids to make you read the fine
print
The tyrants that gave you crisis, left you silenced
Don't breathe a sigh of relief 'till you hear the rescue
sirens

[Spawn]

Supreme, be this team, we got this shit on lock
Obviously we hid the key under an upscale rock
So you could knock all you want to but you ain't gettin'
in
You could try to crash the door but you ain't gettin' in
Nigga, what, my definition is raw, I got you all

Wishin' I'd fall, so things could get better for y'all
But I'm tall, and got game, remain the same for the
duration
Area code 6-1-2, my present location...

[Slug]
Atmosphere...embellished with talent and the wisdom
not abuse it
Blessed with insight, friends and influences
That's what keeps us dope, what makes us dope is the
surroundings
Inspiration stems from love and stress compounding
Stamina: that is achieved over the course of time
In fact, time taught me how to breath, battle, not to
court my mind
Defined as lyricist - the Atmosphericist
Makin sure you fear this shit every time you hear this
shit

[Spawn] Sound is vibration
[Slug] This sound is taken
[Spawn] Sound is vibration
[Slug] And the ground is shakin'
[Spawn] Vibration is sound
[Slug] Yo, we found your replacement
[Spawn] Vibration is sound
[Slug] Now who makes the sound?

[Slug & Spawn] : And who makes the music/sound?
(*fades out*)
