Visit "[Driver-side Daylight](#)" on MotoLyrics.com

It was a long drive home I stopped to think it out
(Maybe today was a waste)
All the things we said and the things we dreamed
about
(Couldn't get couldn't give us away)
And the cold couldn't stop us I concentrate to breathe
in and out
(is this the last time)
Drama and bad news sink my heart as they leave my
mouth
(I'll be alone I'm never alone anymore)
I could be the only air in your lungs you're all I think
about
I'll never let this feeling fade away I'm so sorry

I never had what you ever had bringing me down
Although time goes on I must be lost in the crowd
Daylights taken all our time spent but
We won't forget no we won't forget

I must've drove all night cause I woke up next to you
(maybe today was a waste)
As the sun came up it put everything into view
(couldn't get couldn't give us away)
I could be the only air in your lungs you're all I'm
feeling too
I'll never let this feeling fade away I'm so sorry

I never had what you ever had bringing me down
Although time goes on I must be lost in the crowd
Daylights taken all our time spent but
We won't forget no we won't forget
I never had what you ever had bringing me down
Although time goes on I must be lost in the crowd
Daylights taken all our time spent but
We won't forget no we won't forget
